

Problem-Solution Fit

Date	29 September 2026
Team ID	SWTID-2026-5841
Project Name	FitBuddy – AI Fitness Plan Generator
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

The canvas checks that FitBuddy addresses the root causes, behaviours and limitations of its target users.

1. CUSTOMER SEGMENT(S) [CS] Beginners and casual exercisers aged 13 and above, including students and busy adults, who want a personalised weekly workout plan without paying for a trainer.	6. CUSTOMER LIMITATIONS [CL] (budget, devices) Limited budget; only a phone or laptop with internet; little fitness knowledge; little time to plan workouts.	5. AVAILABLE SOLUTIONS [AS] (pros & cons) Personal trainers: personalised but costly. YouTube and blog plans: free but generic and sometimes unsafe. Fitness apps: structured but often paid and fixed.
2. PROBLEMS / PAINS + ITS FREQUENCY [PR] Do not know what to do each day; plans do not fit their level; they drop out within 1 to 2 weeks. Happens every time they try to start a routine.	9. PROBLEM ROOT / CAUSE [RC] No personalised guidance and no easy way to adjust a plan; trainers are expensive; too many conflicting plans online.	7. BEHAVIOR + ITS INTENSITY [BE] Search repeatedly online, copy random routines, and stop when the plan feels too hard or boring. High effort searching, low follow-through.
3. TRIGGERS TO ACT [TR] A new fitness goal, doctor or health check-up advice, an upcoming event, seeing friends get fit, weight gain.	10. YOUR SOLUTION [SL] FitBuddy: the user enters age, weight, goal and intensity; Google Gemini creates a safe 7-day plan and a nutrition tip in seconds. A feedback box revises the whole plan. Safety rules in every prompt keep advice general and gradual. Works in any browser.	8. CHANNELS OF BEHAVIOR [CH] ONLINE: search engines, YouTube, fitness blogs, Instagram, fitness apps
4. EMOTIONS BEFORE / AFTER [EM] Before: overwhelmed, unsure, discouraged. After: confident, guided, motivated.		OFFLINE Advice from friends and family, gym trainers, local classes
