FitBuddy – Customer Journey (emotion curve)

Stage	User action	System response	User feeling / opportunity
Awareness	Opens the FitBuddy home page	Shows a short intro and a simple form	Curious – keep the form short
Input	Enters name, user ID, age, weight, goal, intensity	Validates the fields (e.g. age 13–100)	Confident – clear error messages help
Generation	Clicks Generate 7-Day Plan	Loading overlay; Gemini builds the plan and a nutrition tip	Anticipation – progress feedback
Result	Reads the Day 1–7 plan and the tip	Shows warm-up, main workout, cooldown	Satisfied – plan is clear
Feedback	Types feedback, e.g. "too many leg days"	Gemini returns a fully revised plan; saved in the DB	Empowered – plan adapts
Return	Uses the same user ID later	Existing record is reset with a new plan	Loyal – continuity

Note: the emotion curve is an illustrative estimate of user sentiment at each stage, not measured data.
