

Problem-Solution Fit

Project Design Phase · AI/ML and GenAI Track

User problem	FitBuddy solution	Fit
Do not know what exercises to do	LLM builds a structured Day 1–7 plan	Strong
Plan does not match age, goal or effort level	Prompt is personalised with age, weight, goal and intensity	Strong
Generic plans cannot be changed	Feedback box regenerates the full plan	Strong
Worry about unsafe advice	Safety rules in every prompt; reminder to consult a professional	Good (not a substitute for a professional)
Confusion about diet	Short, non-restrictive nutrition/recovery tip	Moderate

Fit summary

The core problem is lack of personalised, adaptable guidance. FitBuddy addresses this directly with personalised generation and a feedback loop. The main limits are that the advice is AI-generated general wellness guidance and that nutrition help is intentionally light.
